Description

NJ001M4 is an ultra-compact, lightweight ribbon fusion splicer that can splice single fibers and up to 4 fiber ribbons. It was designed to be smaller and more lightweight than previous models and also allows faster operation.
It supports splicing of single fiber drop cables and 2 fiber drop cables.

Features

- Wide splicing chamber
- High capacity battery enables 100 cycles of splicing and heating
- High speed splicing of 15 sec and high speed heating of 30 sec
- Ruggedized design
- Fiber Curl Remove function is available
- Compact size and light weight
- High-torque motors are installed for drop cable splicing
- Automatic fusion program selection is available
- Heater adjustment function is available
