### Description

Portable vibration analyzer for equipment diagnosis and on-site measurements.  
Vibration meter with FFT analysis function.

- \* Vibration meter mode: Allows simultaneous measurement of acceleration, velocity, displacement, and acceleration crest factor.
- \* FFT analyzer mode: Real-time analysis frequency 20 kHz, 3 200 spectral lines and available Envelope processing.
- \* Waveform data storing on SD card for post process/analysis.
- \* Option: Waveform analysis software, Comparator software
